

Services for R&D Laboratories

The members of our life science teams look back on a long-time experience in pharmaceutical research and development. The strong cross-functional background of our consultants combines profound expertise in drug discovery and development with a track record of successfully realized innovative IT projects. This unique positioning enables us to seamlessly integrate into both, service-oriented IT-departments as well as specialist areas in R&D. Our integrated approach, spanning over disciplines and technologies, enables innovative research models by enforcing cross-functional integration.

Our vision

Our vision is to be the preferred partner of pharmaceutical companies for building a solid bridge between innovative R&D and cutting-edge information technology. We provide a unique combination of strategic consulting, project management and technical services.

- As the preferred partner for IT-departments, we provide experts with substantiated business know-how in their respective fields of pharmaceutical R&D. We help the IT to understand business needs and perfectly support R&D projects
- As the preferred partner for R&D business areas, we leverage the application of innovative IT solutions and hence accelerate drug discovery and development projects, increase efficiency and raise success rates.

What we can do for you

We assist you in developing your specific laboratory IT infrastructure for single laboratories or for your global organization

We perform solid business analysis and compile requirement specification documents for your IT-projects

We conduct unbiased vendor assessments

We develop custom tailored software for your laboratories

We customize commercial products and integrate them into your environment

We manage your IT projects, integrating internal and external partners and ensuring 21 CFR part 11 compliance

We operate your IT systems, relieving you from administrative tasks and documentation

We improve efficiency and quality of your laboratories

Our key strengths

wega has gathered profound experience in implementing IT systems for laboratories in pre-clinical and clinical development as well as in research

Our experts have an excellent understanding of laboratory workflows and of software validation requirements

We know how to adopt standard software and technologies to best fit your specific needs

Our cross-functional teams unite experienced R&D scientists and IT experts with long-time experience in GxP environment

The unique skill-set of our teams enables us to bridge between business and technology

We provide the technical expertise in state-of-the-art IT technologies, required for optimizing your business

We have long-time experience in facilitating laboratory workflows and in process optimization.

Our experience in laboratory IT is your advantage

Implementation of IT systems under regulation of 21 CFR Part 11

Laboratory information management systems (LIMS)

Compound and sample logistics

Integration of pre-clinical and clinical information systems

Development of custom-tailored user interfaces and reports

Project management and project lead

Process optimization and electronic workflows

Electronic archiving

Electronic document management

Working in global environments

Knowledge management solutions that efficiently provide decision bodies with relevant information.

Services

- Life Science Consulting
- Business Analysis
- Solution Engineering

- Technical Consulting
- DBA Services
- Project Management
